

# 10.5% Rule

Maps Indicating Location of Assessed, Not Assessed Stations\*  
For DO, pH, & Temperature

\*Reservoir and Chowan Basin  
Stations Not Included

## Stations Not Assessed for DO

1 – 9 Data Points w/ 1 violation

Total # stations = 59

### Legend

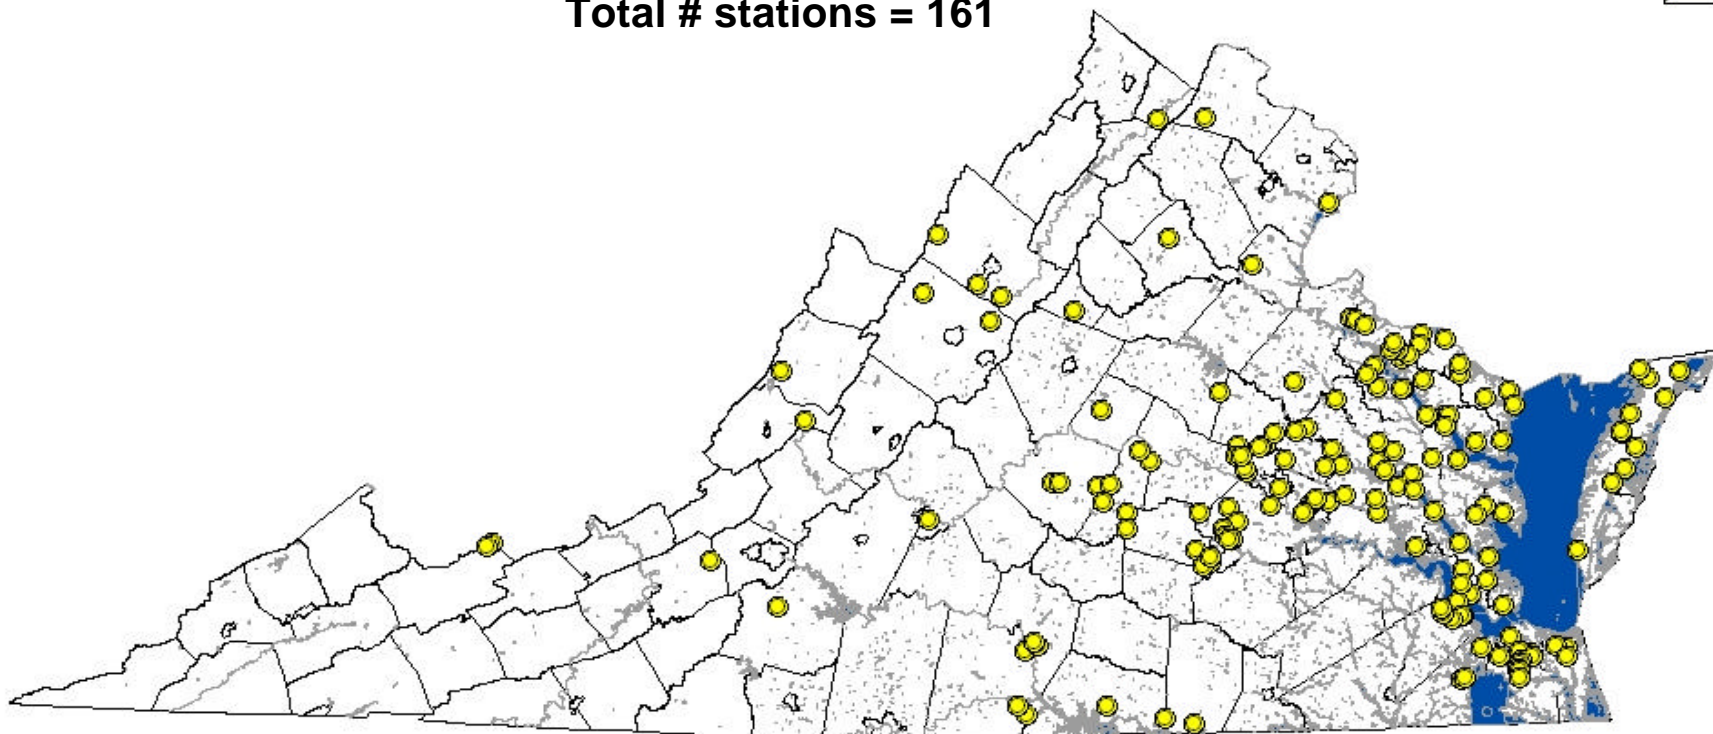

★ DO 1-9 Data Points w/ 1 Violation

This slide shows stations that would not be assessed for DO because of the '2-hit rule' (less than 10 data points and only 1 hit are not assessed).

**Stations Assessed as Unimpaired  
DO Violations  $\leq 10.5\%$  of Total Data**

**Total # stations = 161**

**Legend**

● DO Violation  $\leq 10.50\%$  = Unimpaired

**Stations Assessed as Impaired**  
**DO Violations > 10.5% of Total Data**  
**Total # stations = 143**

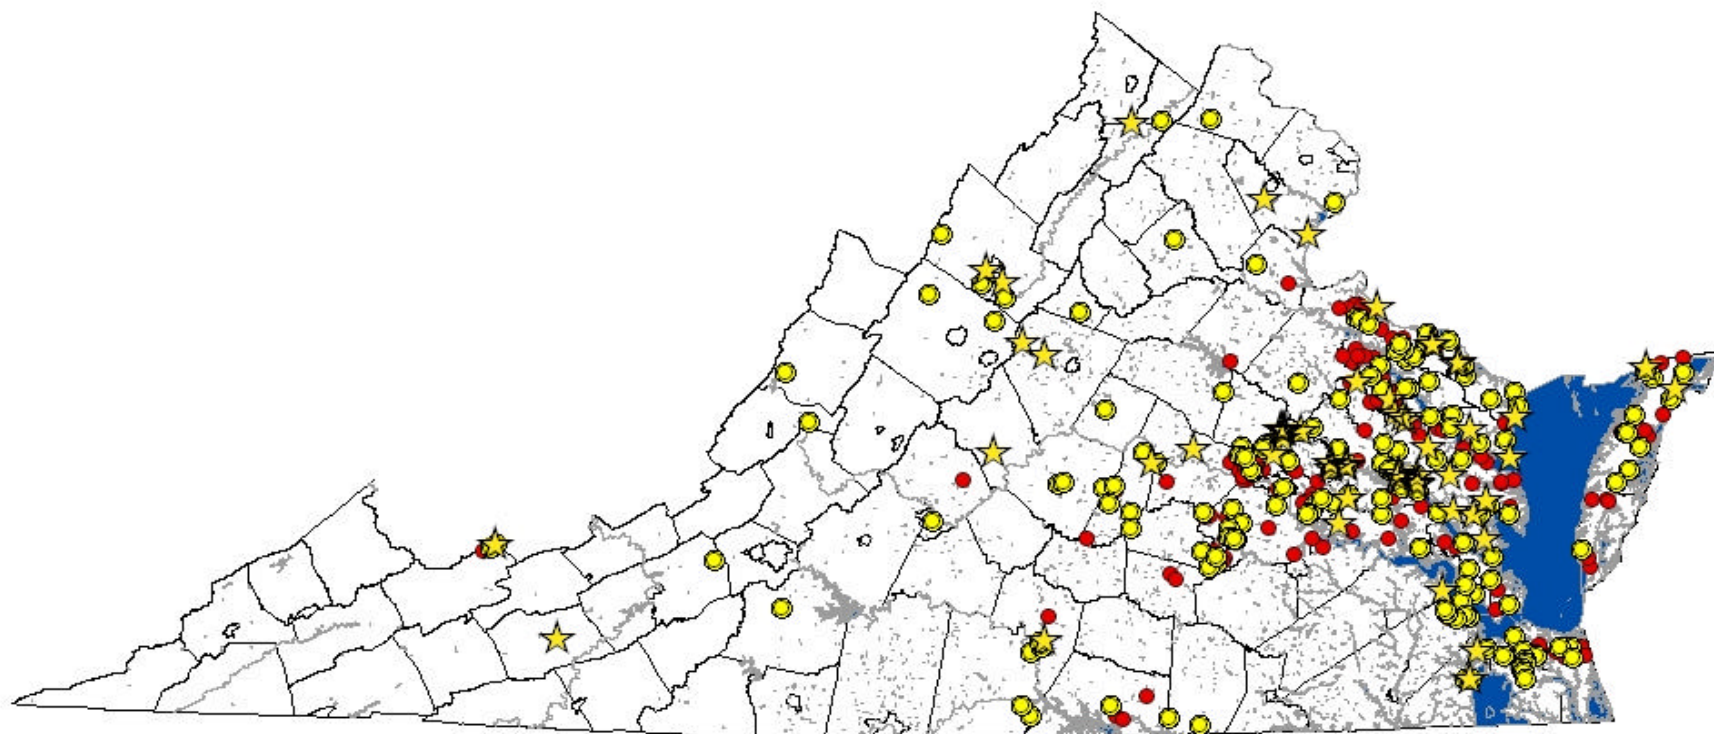

**Legend**

- DO Violation > 10.50% = Impaired (No Resv.)

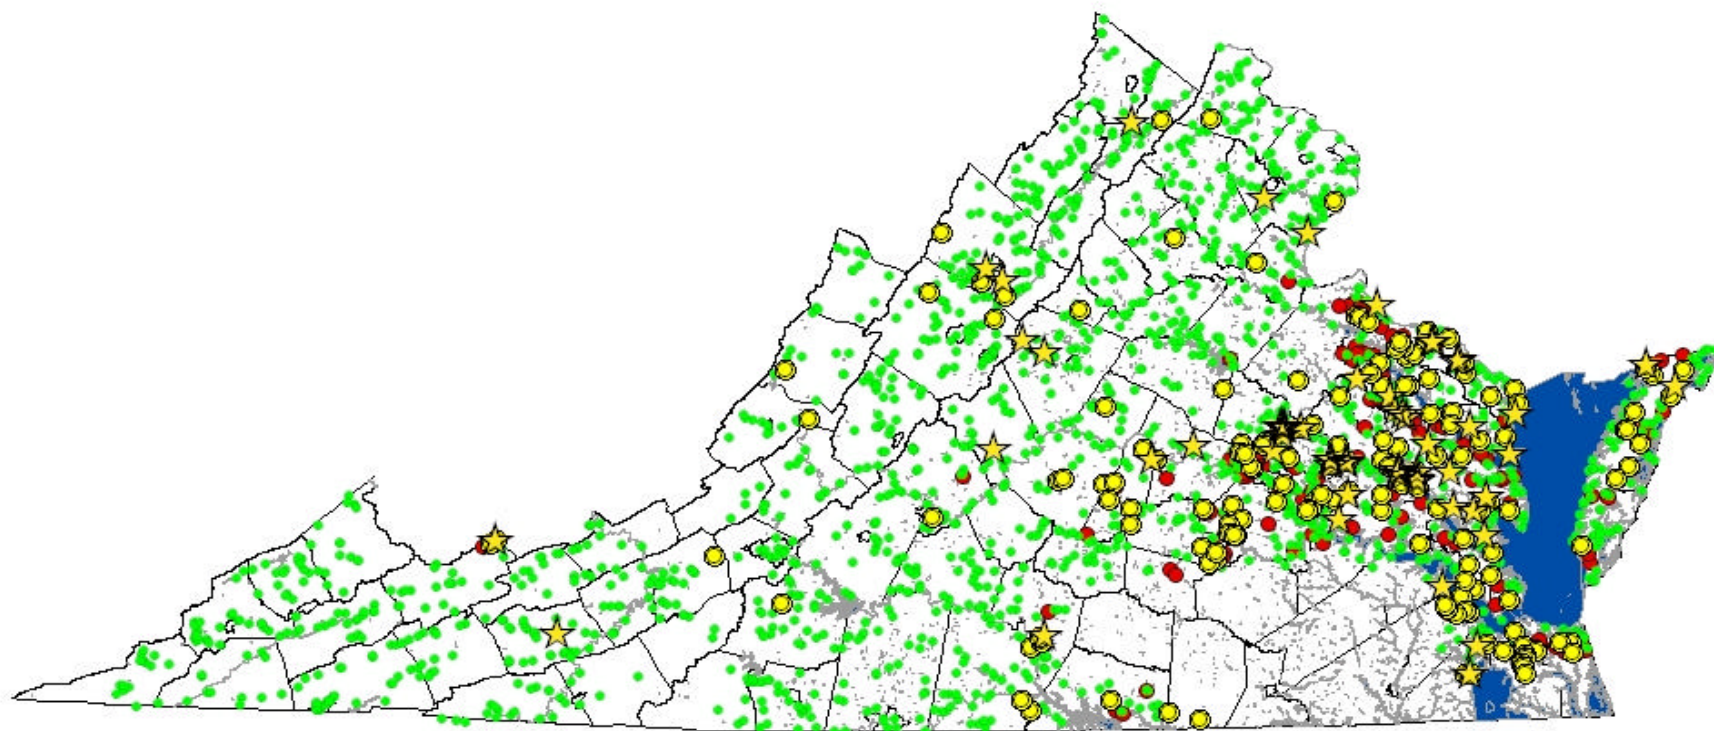

## Stations Impaired, Unimpaired, and Not Assessed for DO

### Legend

-  DO Violation  $\leq 10.50\%$  = Unimpaired
-  DO Violation  $> 10.50\%$  = Impaired
-  DO 1-9 Data Points w/ 1 Violation

**Stations w/ Zero DO violations Impaired,  
Unimpaired, and Not Assessed for DO**  
**Total # stations w/ zero violations = 1813**

**Legend**

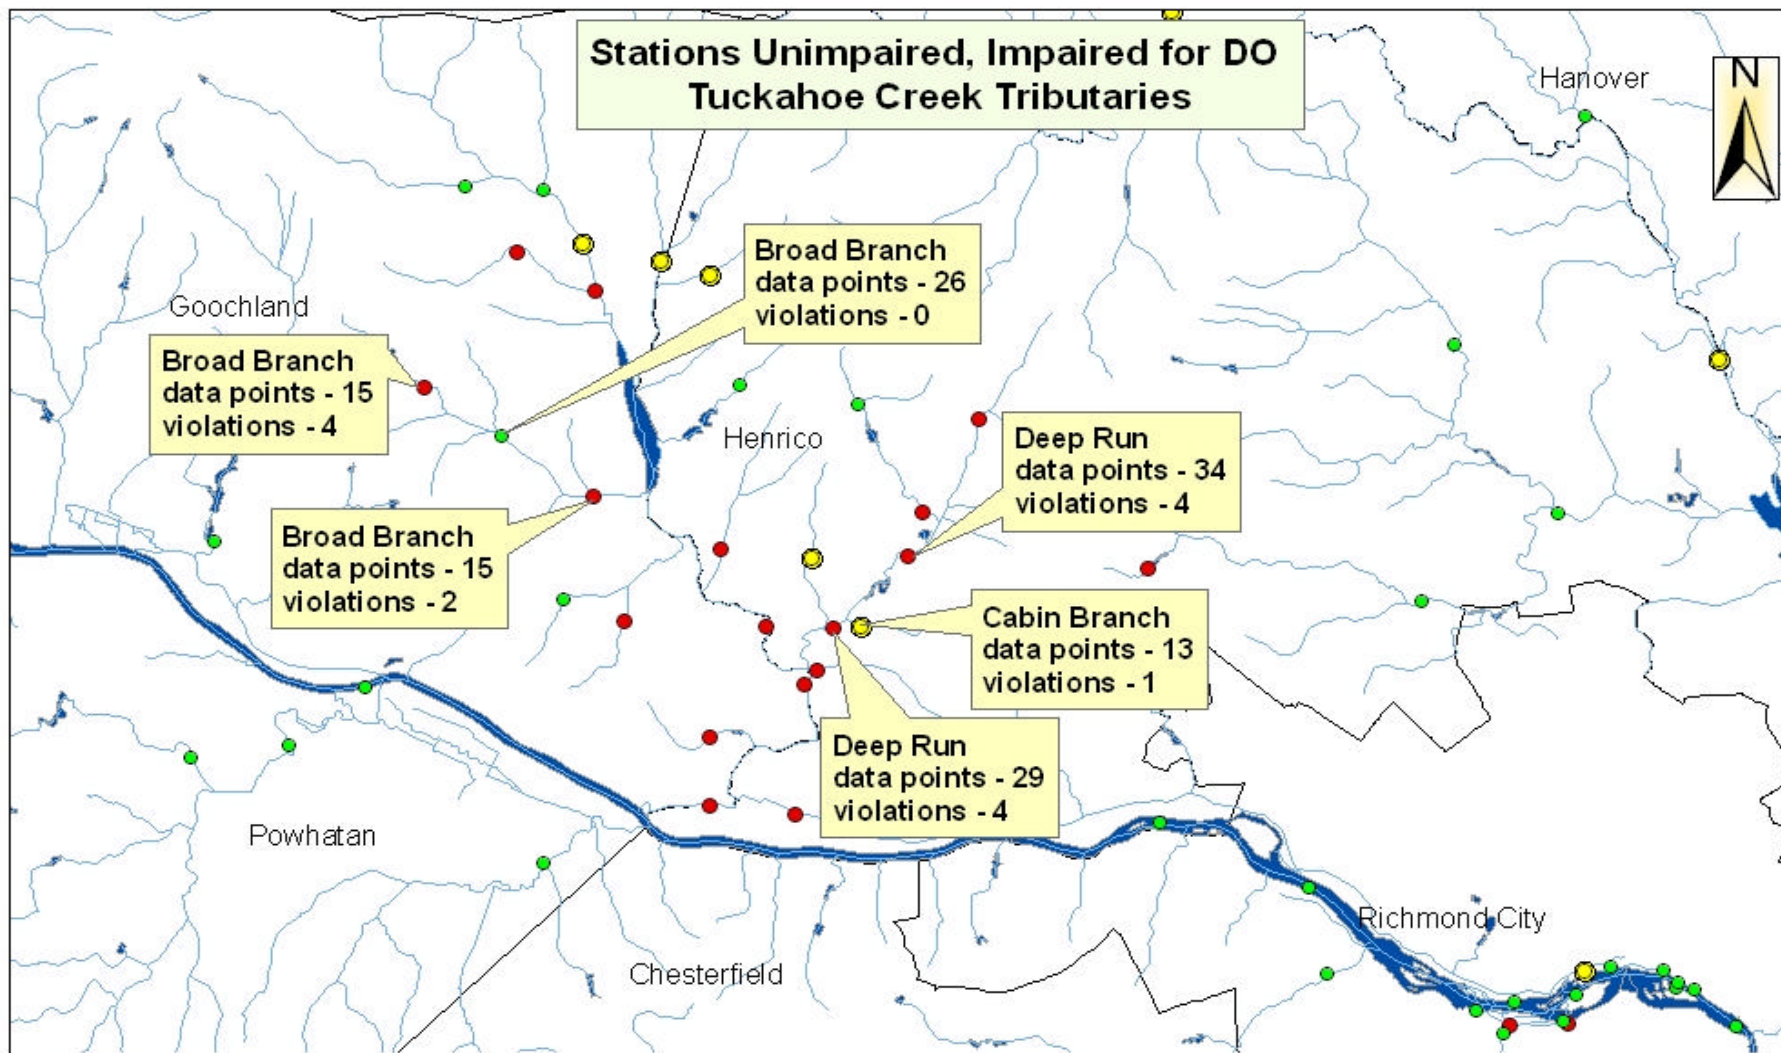

- DO Violations = 0
- DO Violation  $\leq 10.50\%$  = Unimpaired
- DO Violation  $> 10.50\%$  = Impaired
- ★ DO 1-9 Data Points w/ 1 Violation

# **10.5% Methodology in Action**

## **Tuckahoe Creek**

### **James Basin**

Note the co-location of stations with impairments and those with no impairments in the following slide in the same watershed.

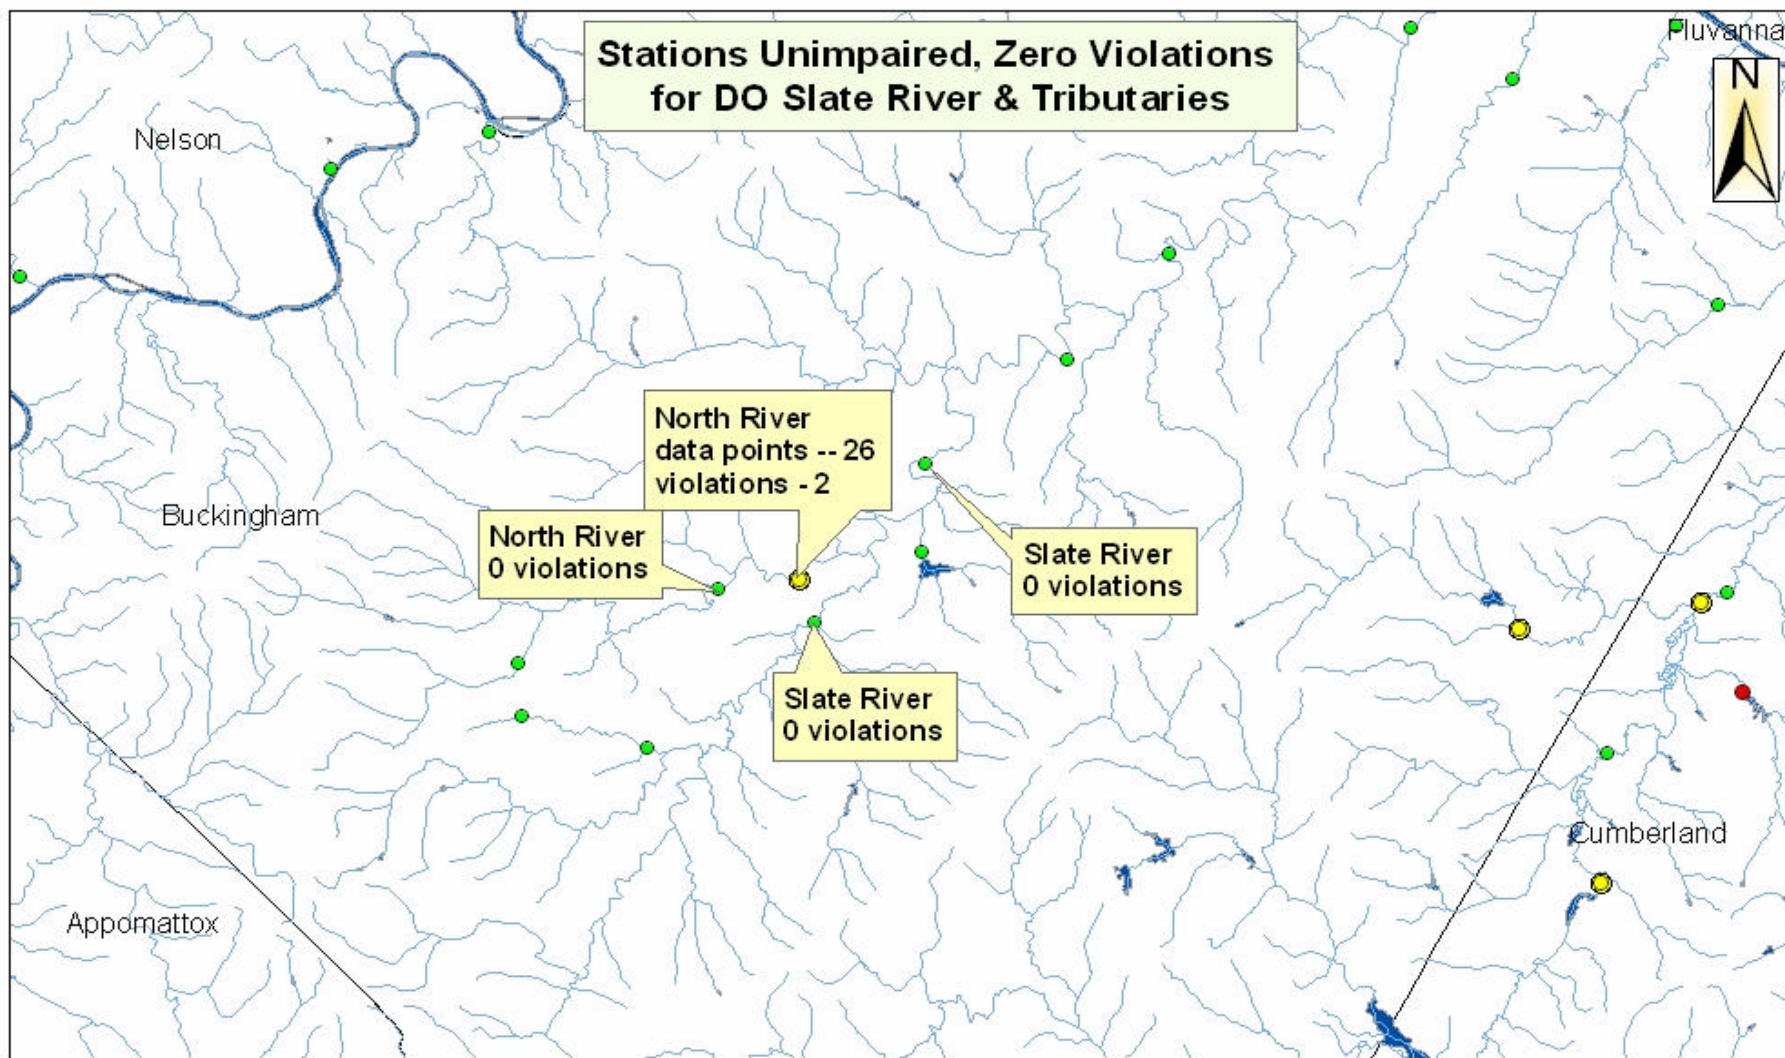

# **10.5% Methodology in Action**

## **North and Slate Rivers**

### **James Basin**

North River would be listed as impaired under 'no rules' scenario. Slate River downstream zero violations

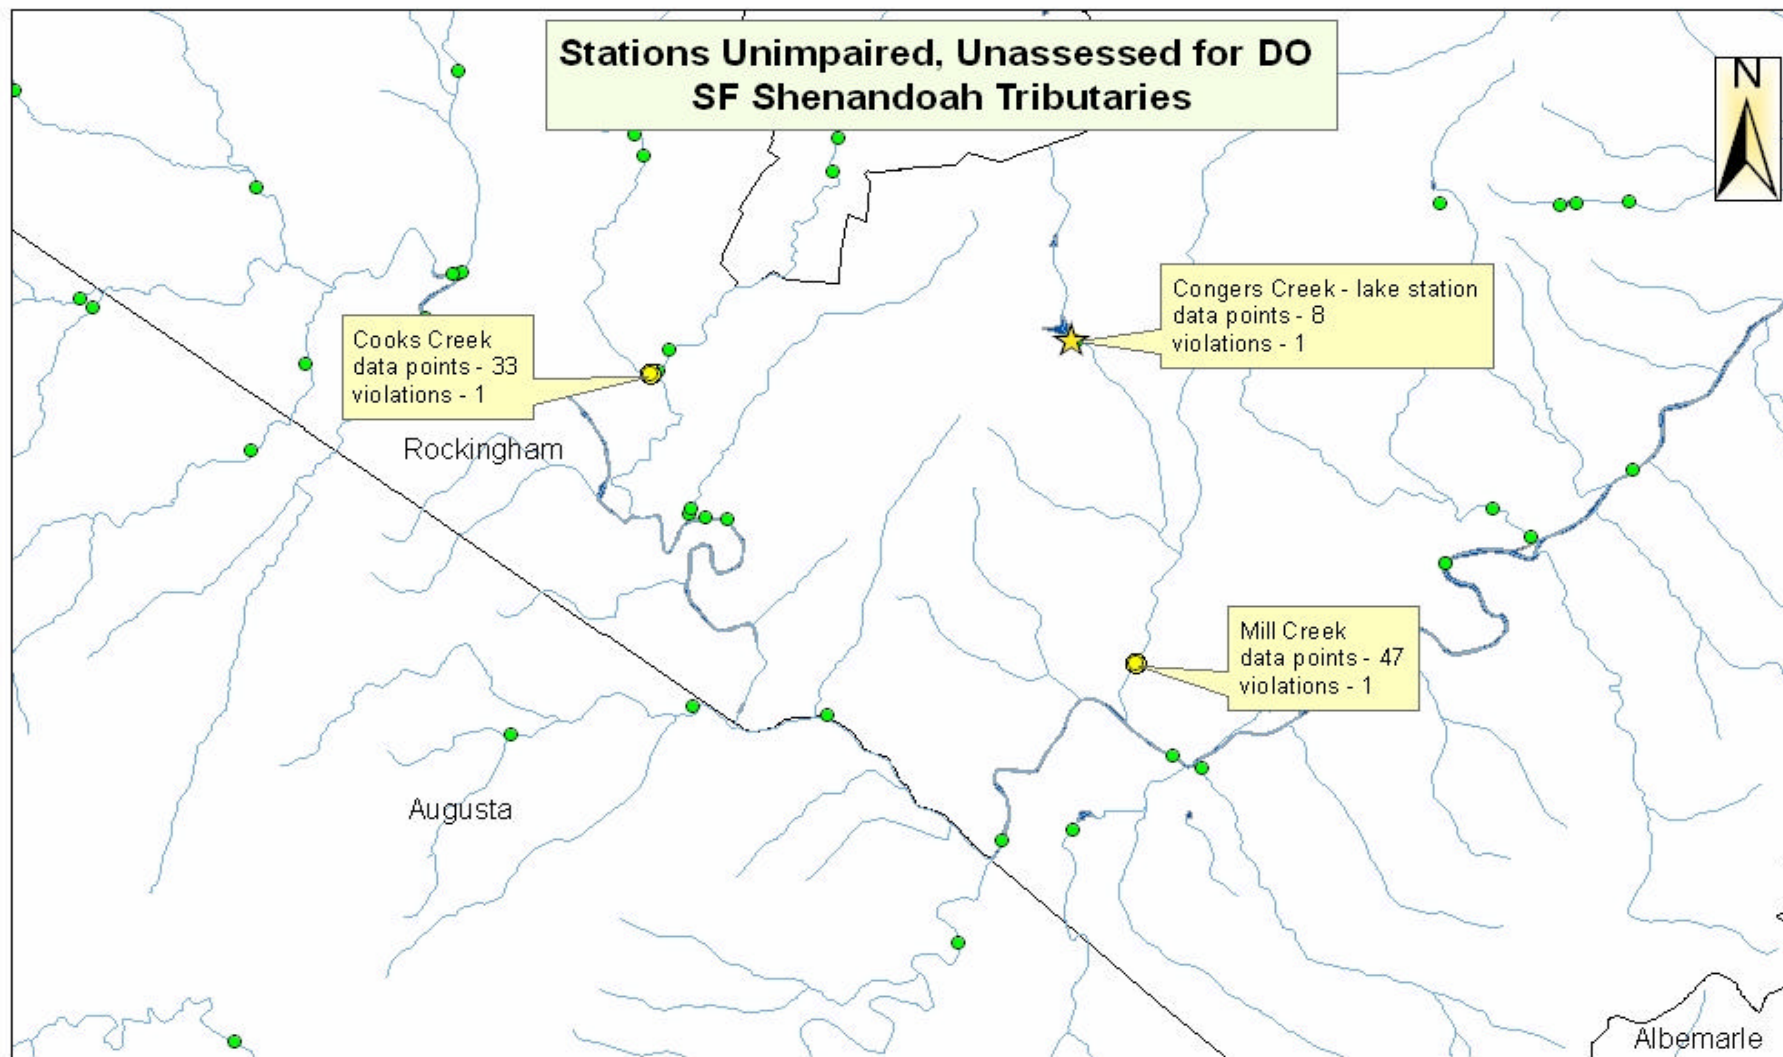

### Legend

- DO Violations = 0
- DO Violation  $\leq 10.50\%$  = Unimpaired
- DO Violation  $> 10.50\%$  = Impaired
- ★ DO 1-9 Data Points w/ 1 Violation

**10.5% Methodology in Action**  
**Cooks, Congers, Mill Creeks**  
**SF Shenandoah**

All would be listed as impaired under 'no rules' scenario.

# Stations Unimpaired, Unassessed for DO SF Shenandoah Tributaries

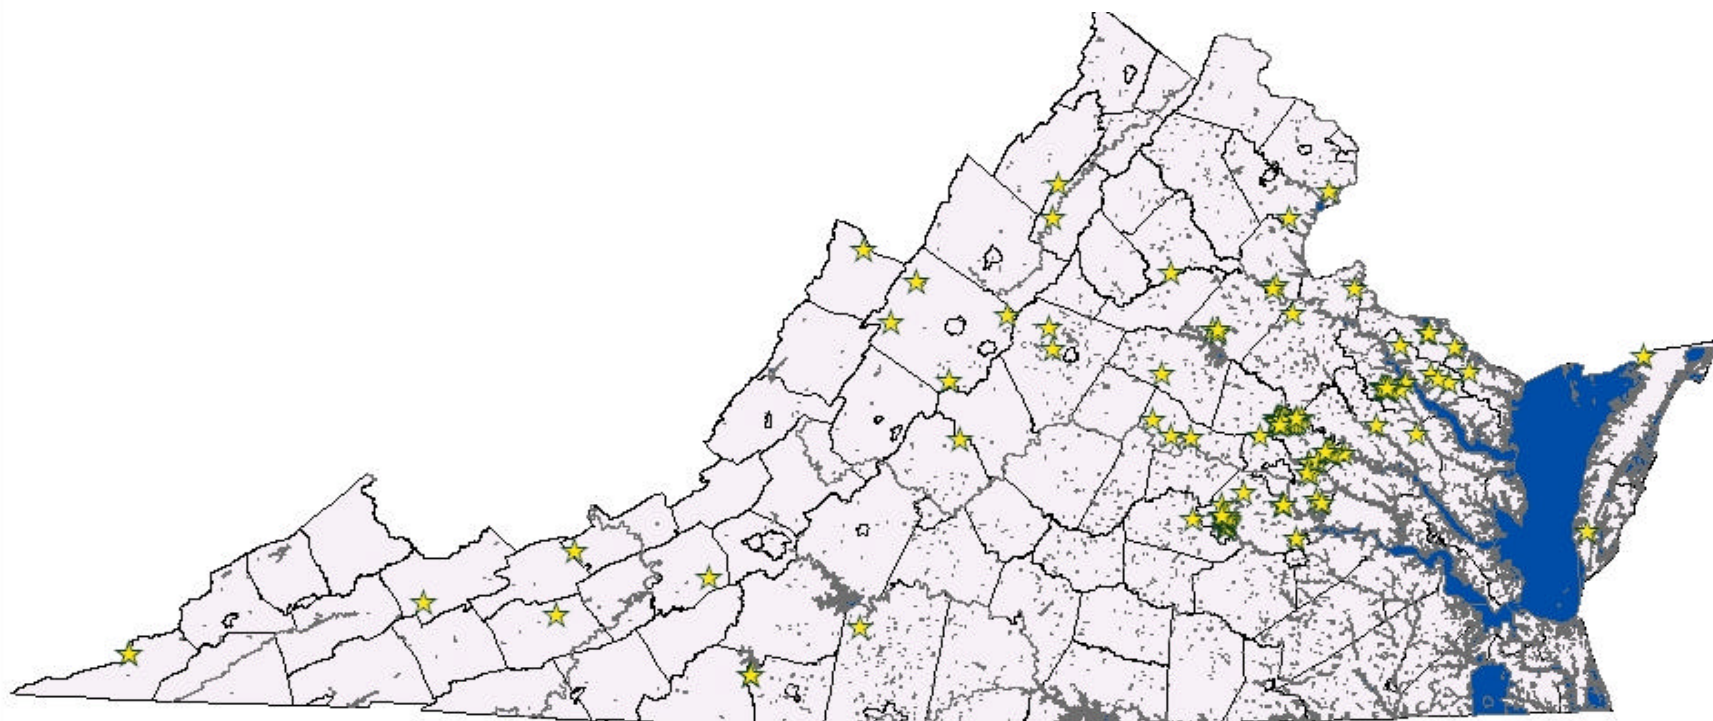

## Legend

- DO Violations = 0
- DO Violation  $\leq 10.50\%$  = Unimpaired
- DO Violation  $> 10.50\%$  = Impaired
- ★ DO 1-9 Data Points w/ 1 Violation

**Stations Not Assessed for pH  
1 – 9 Data Points w/ 1 violation  
Total # stations = 158**

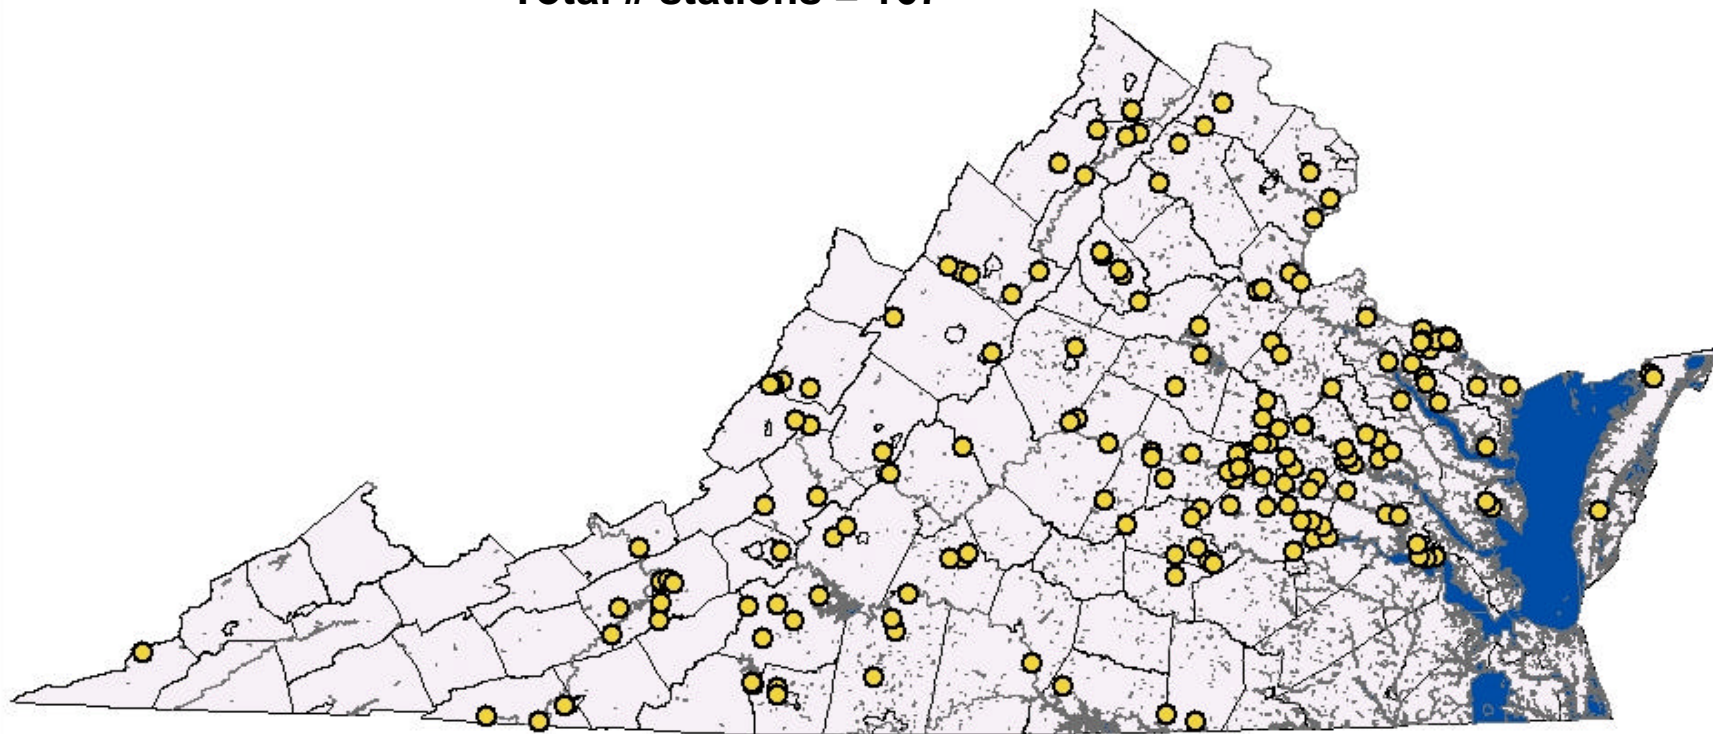

**Legend**

★ pH 1 - 9 Data Points w/ 1 Violation

**This slide shows stations that would not be assessed for pH because of the '2-hit rule' (less than 10 data points and only 1 hit are not assessed).**

**Stations Assessed as Unimpaired  
pH Violations  $\leq 10.5\%$  of Total Data**

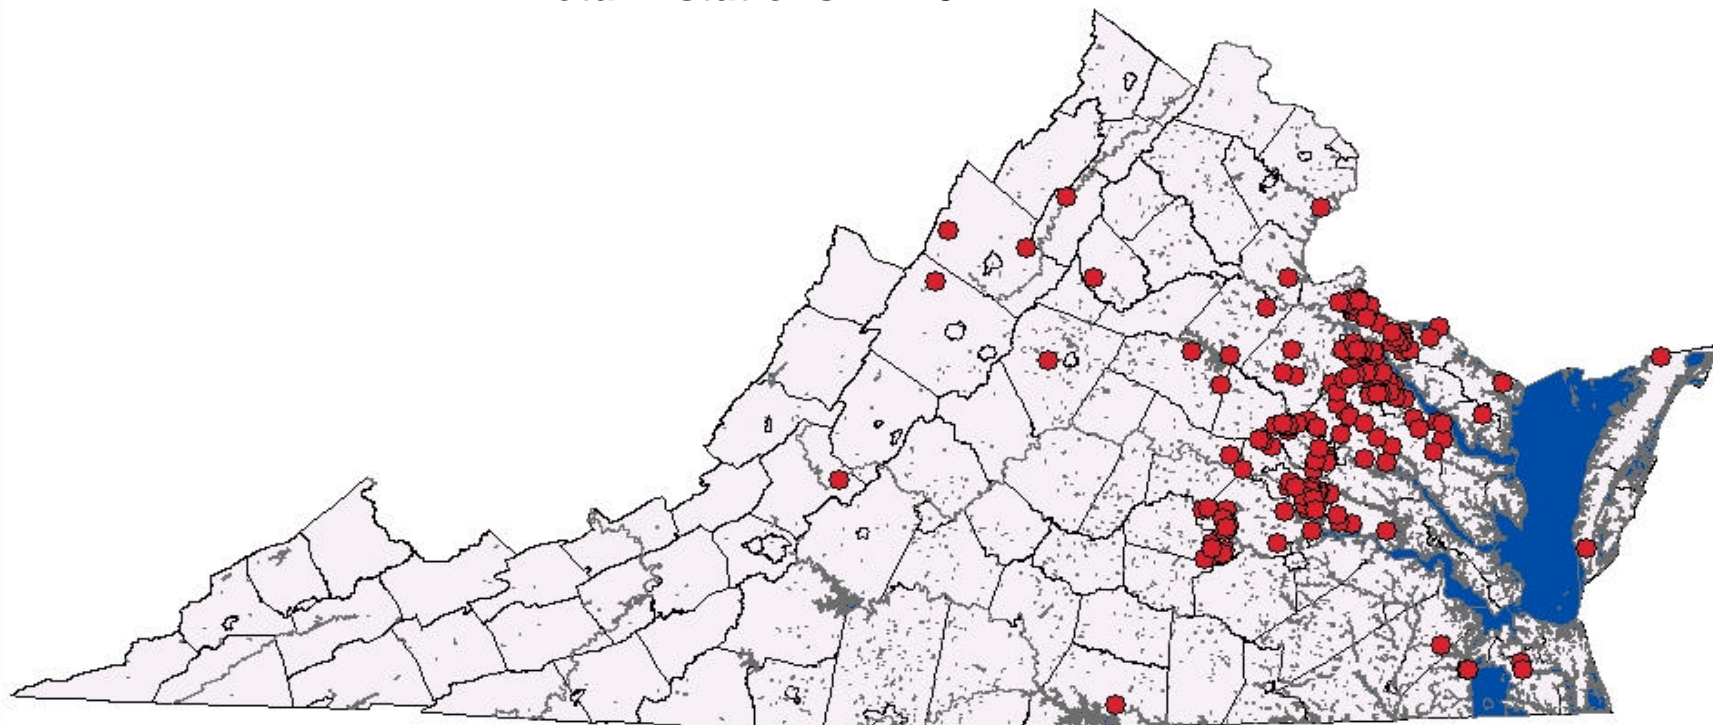

**Total # stations = 167**

**Legend**

● pH Violations  $\leq 10.5\%$  = Unimpaired

**Stations Assessed as Impaired  
pH Violations > 10.5% of Total Data  
Total # stations = 175**

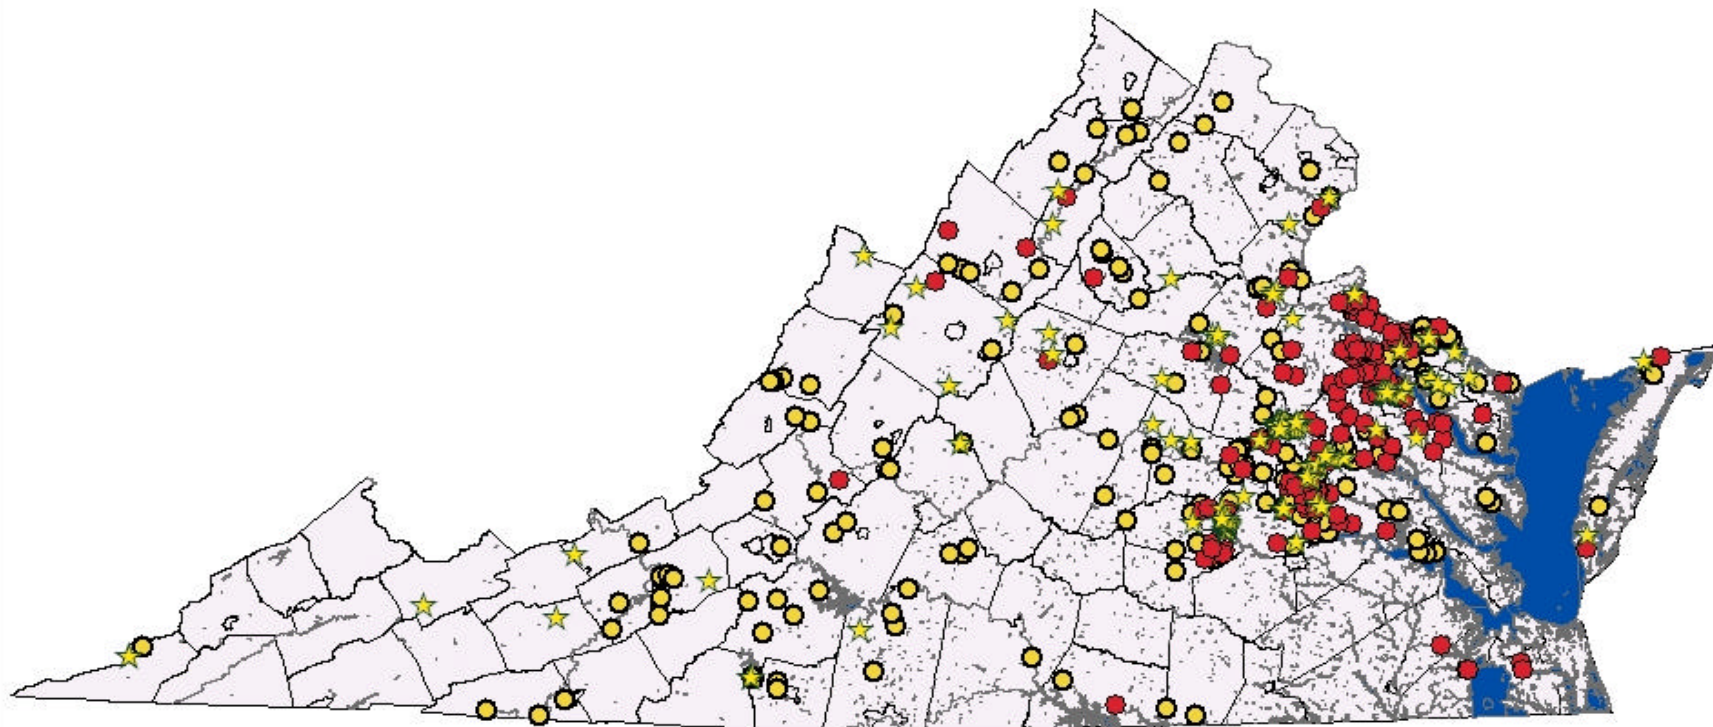

**Legend**

● pH Violations > 10.5% = Impaired

## Stations Impaired, Unimpaired, and Not Assessed for pH

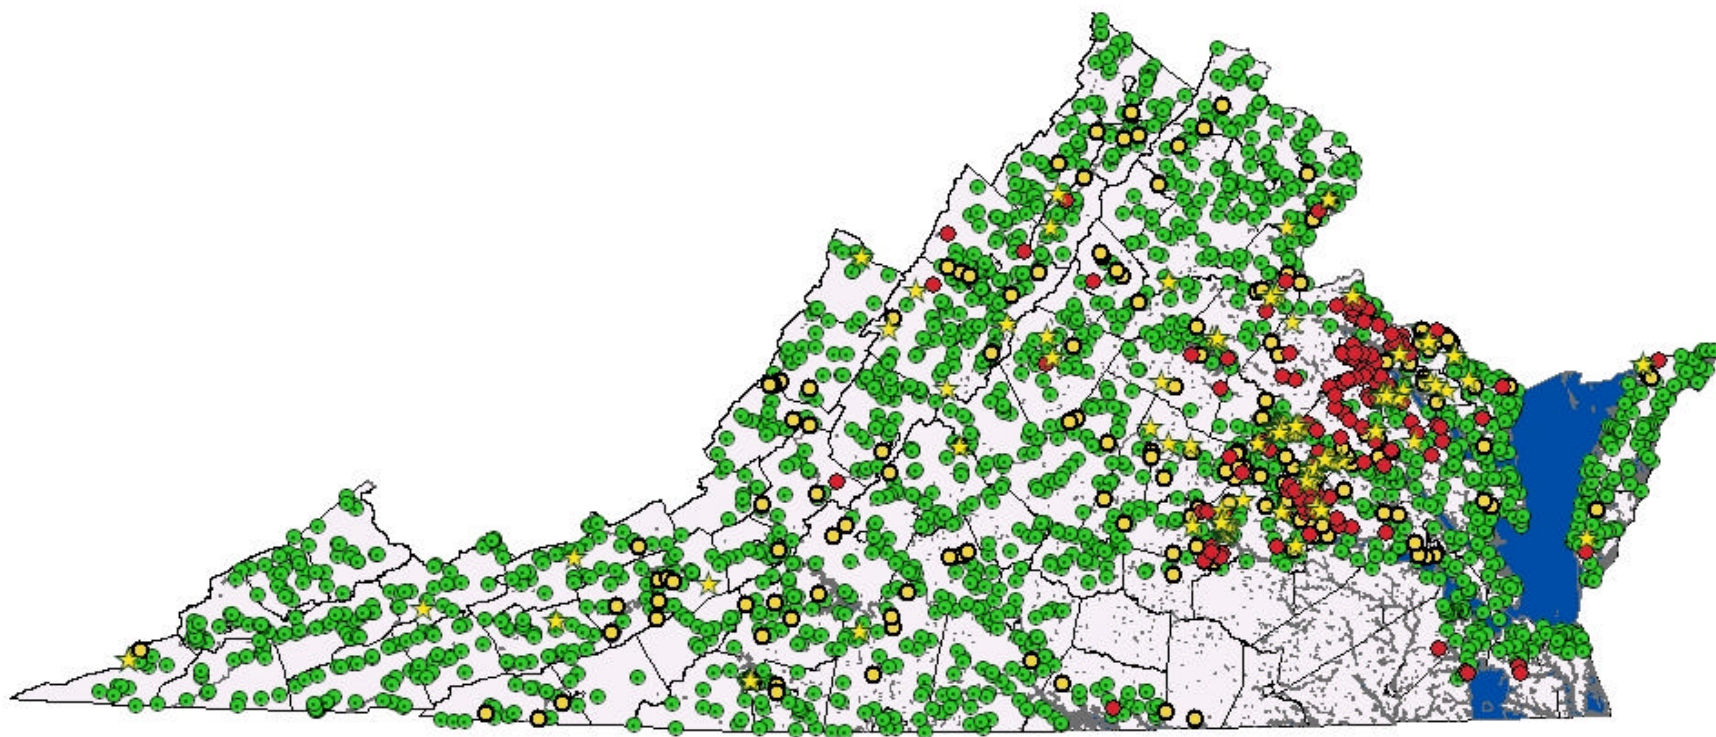

### Legend

-  pH Violations  $\leq 10.5\%$  = Unimpaired
-  pH Violations  $> 10.5\%$  = Impaired
-  pH 1 - 9 Data Points w/ 1 Violation

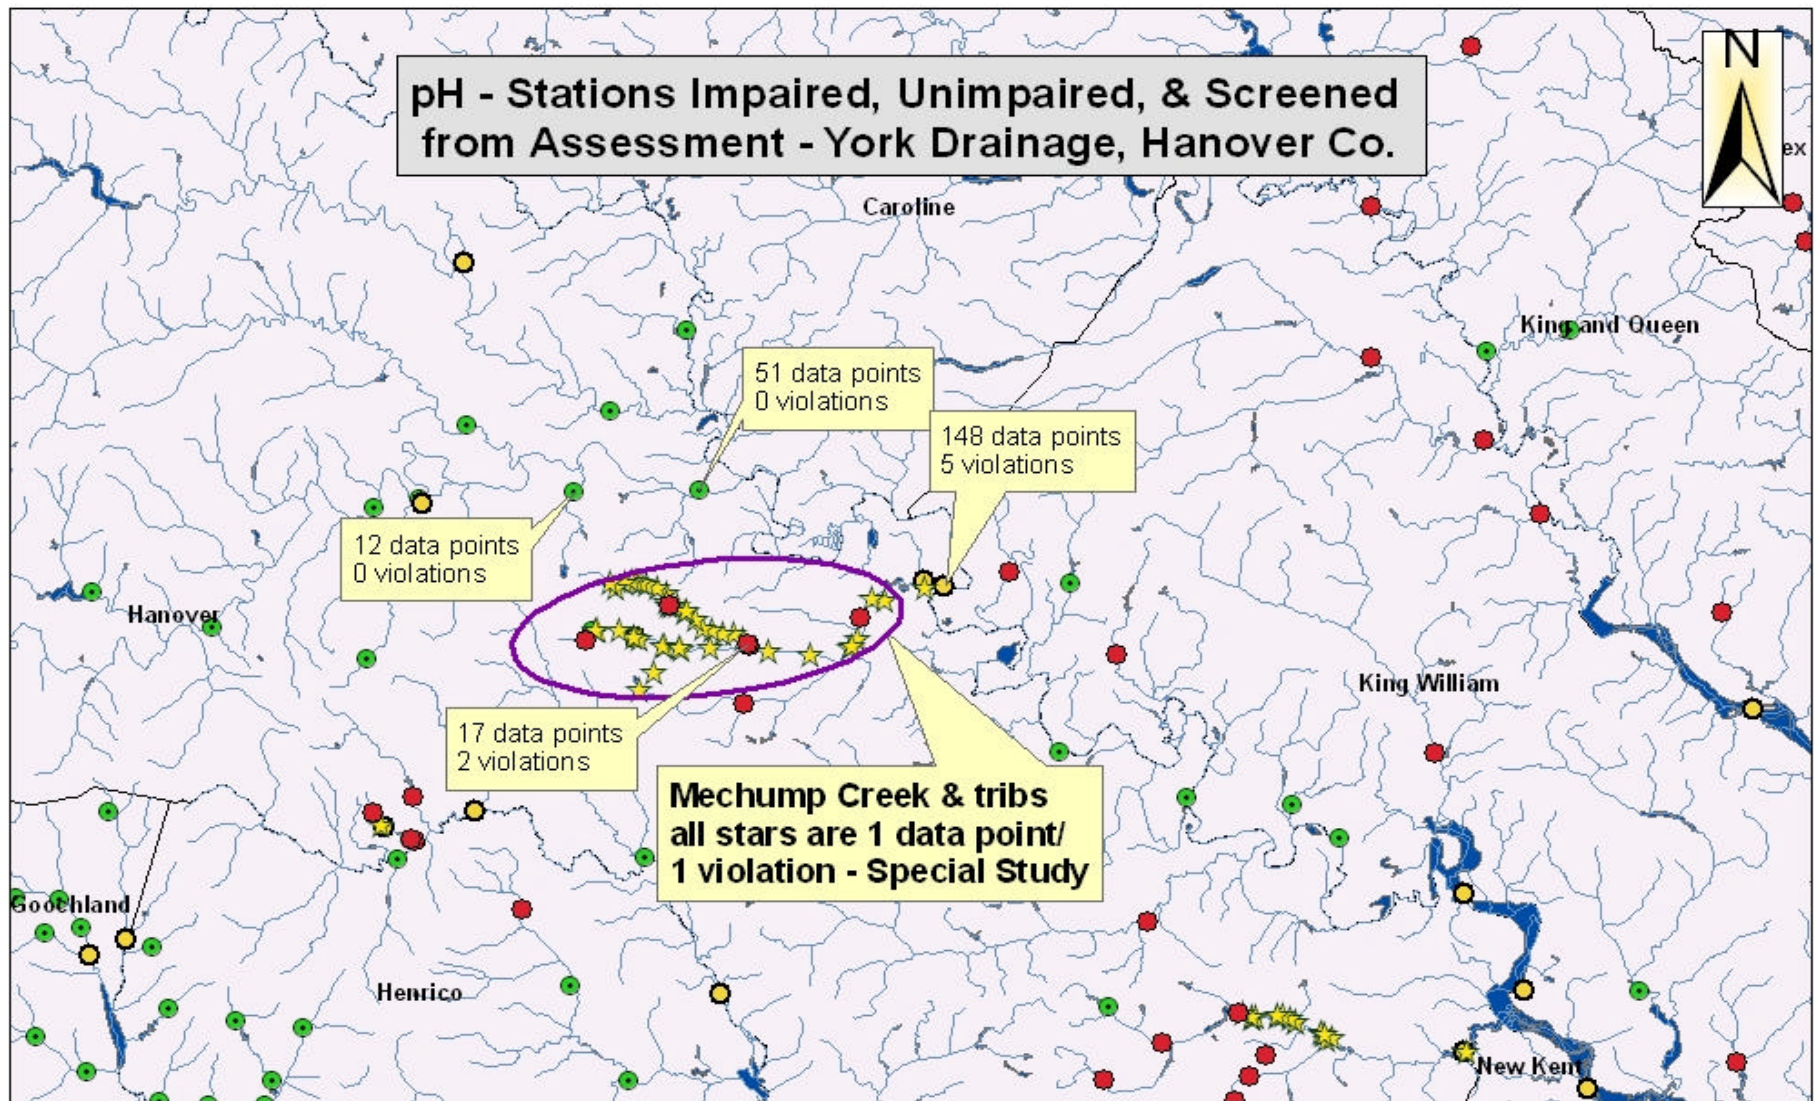

**Stations w/ Zero pH violations Impaired,  
Unimpaired, and Not Assessed for pH**  
**Total # stations w/ zero violations = 1913**

**Legend**

- pH Violations = 0 = Unimpaired
- pH Violations  $\leq 10.5\%$  = Unimpaired
- pH Violations  $> 10.5\%$  = Impaired
- ★ pH 1 - 9 Data Points w/ 1 Violation

# pH - Stations Impaired, Unimpaired, & Screened from Assessment - York Drainage, Hanover Co.

## Legend

- pH Violations = 0 = Unimpaired
- pH Violations ≤ 10.5% = Unimpaired
- pH Violations > 10.5% = Impaired
- ★ pH 1 - 9 Data Points w/ 1 Violation

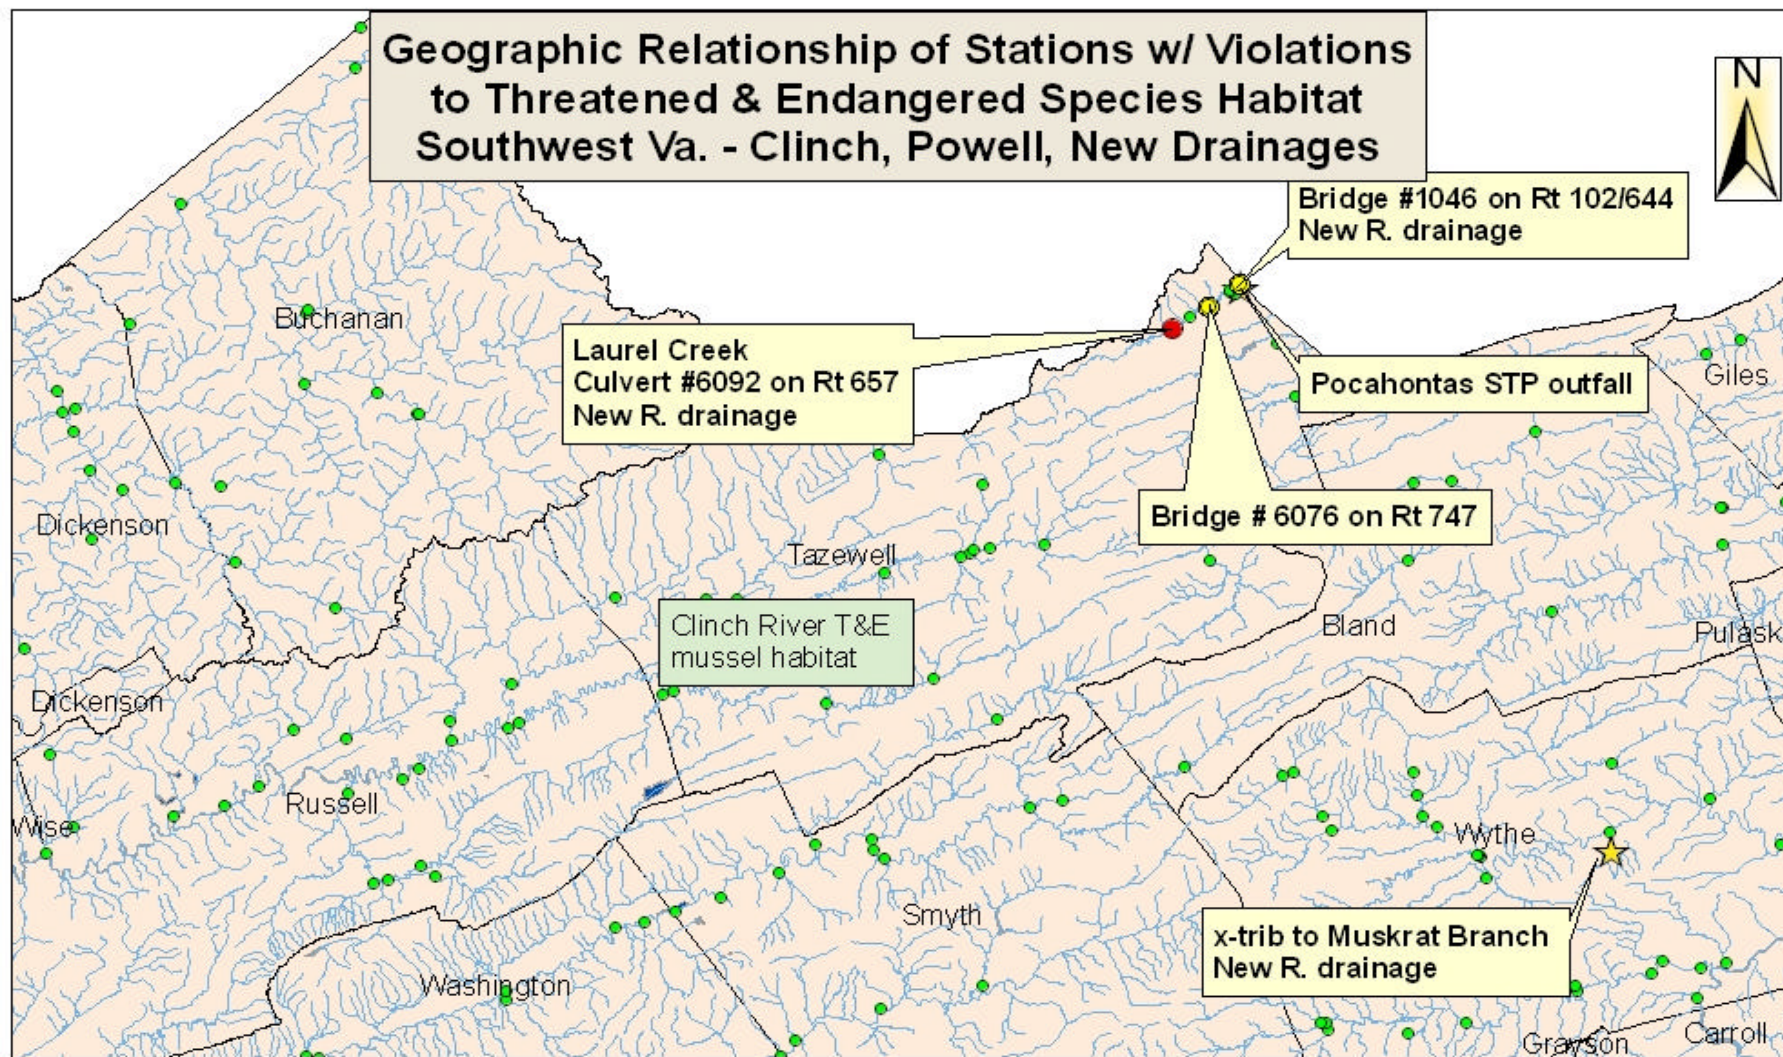

Many unassessed stations have single data points and are a result of Special Studies.

# **DO Violations w/i Threatened & Endangered Species Waters**

The following slides illustrate the geographic relationship of stations, assessed and unassessed for DO, to T&E species habitat.

Upper Roanoke, Upper James, and Middle James were only areas with T&E waters with fully aquatic species (mussels, fish) containing stations with DO violations directly within the T& E water body or within the immediate watershed.

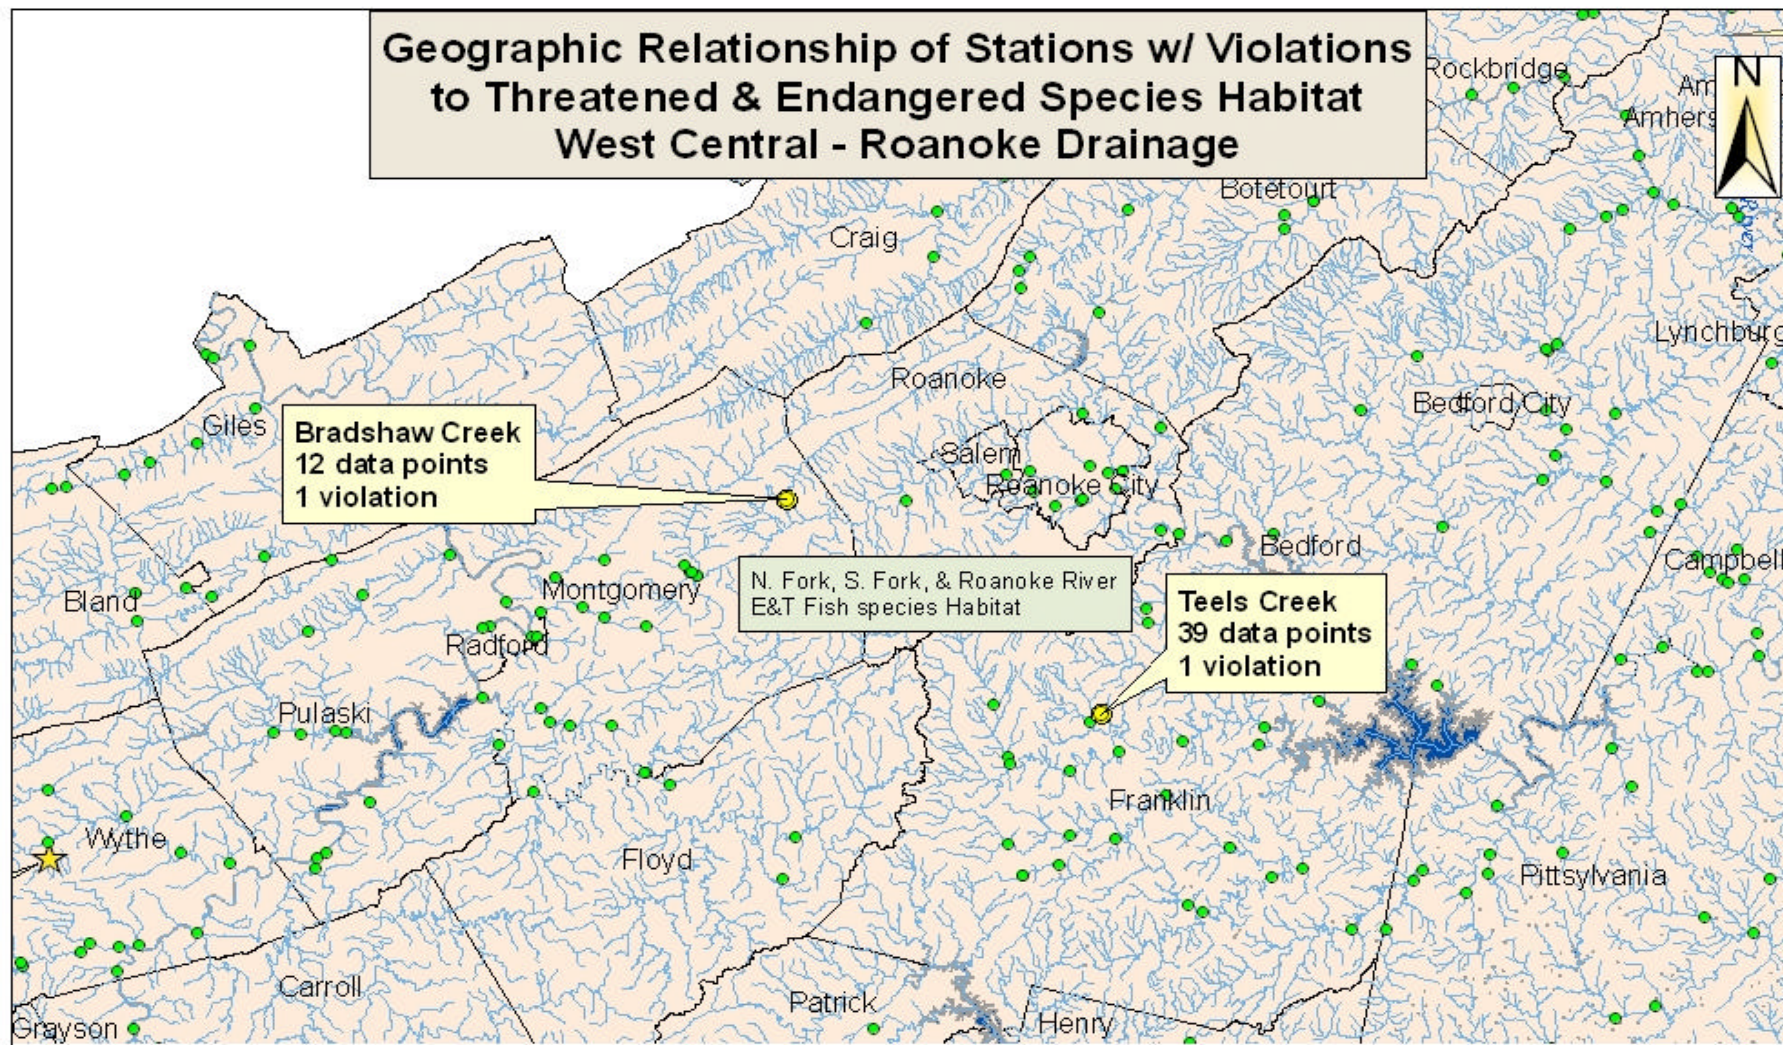

**0 DO violations w/i Clinch/Powell/  
Holston drainage**

# Geographic Relationship of Stations w/ Violations to Threatened & Endangered Species Habitat West Central - Roanoke Drainage

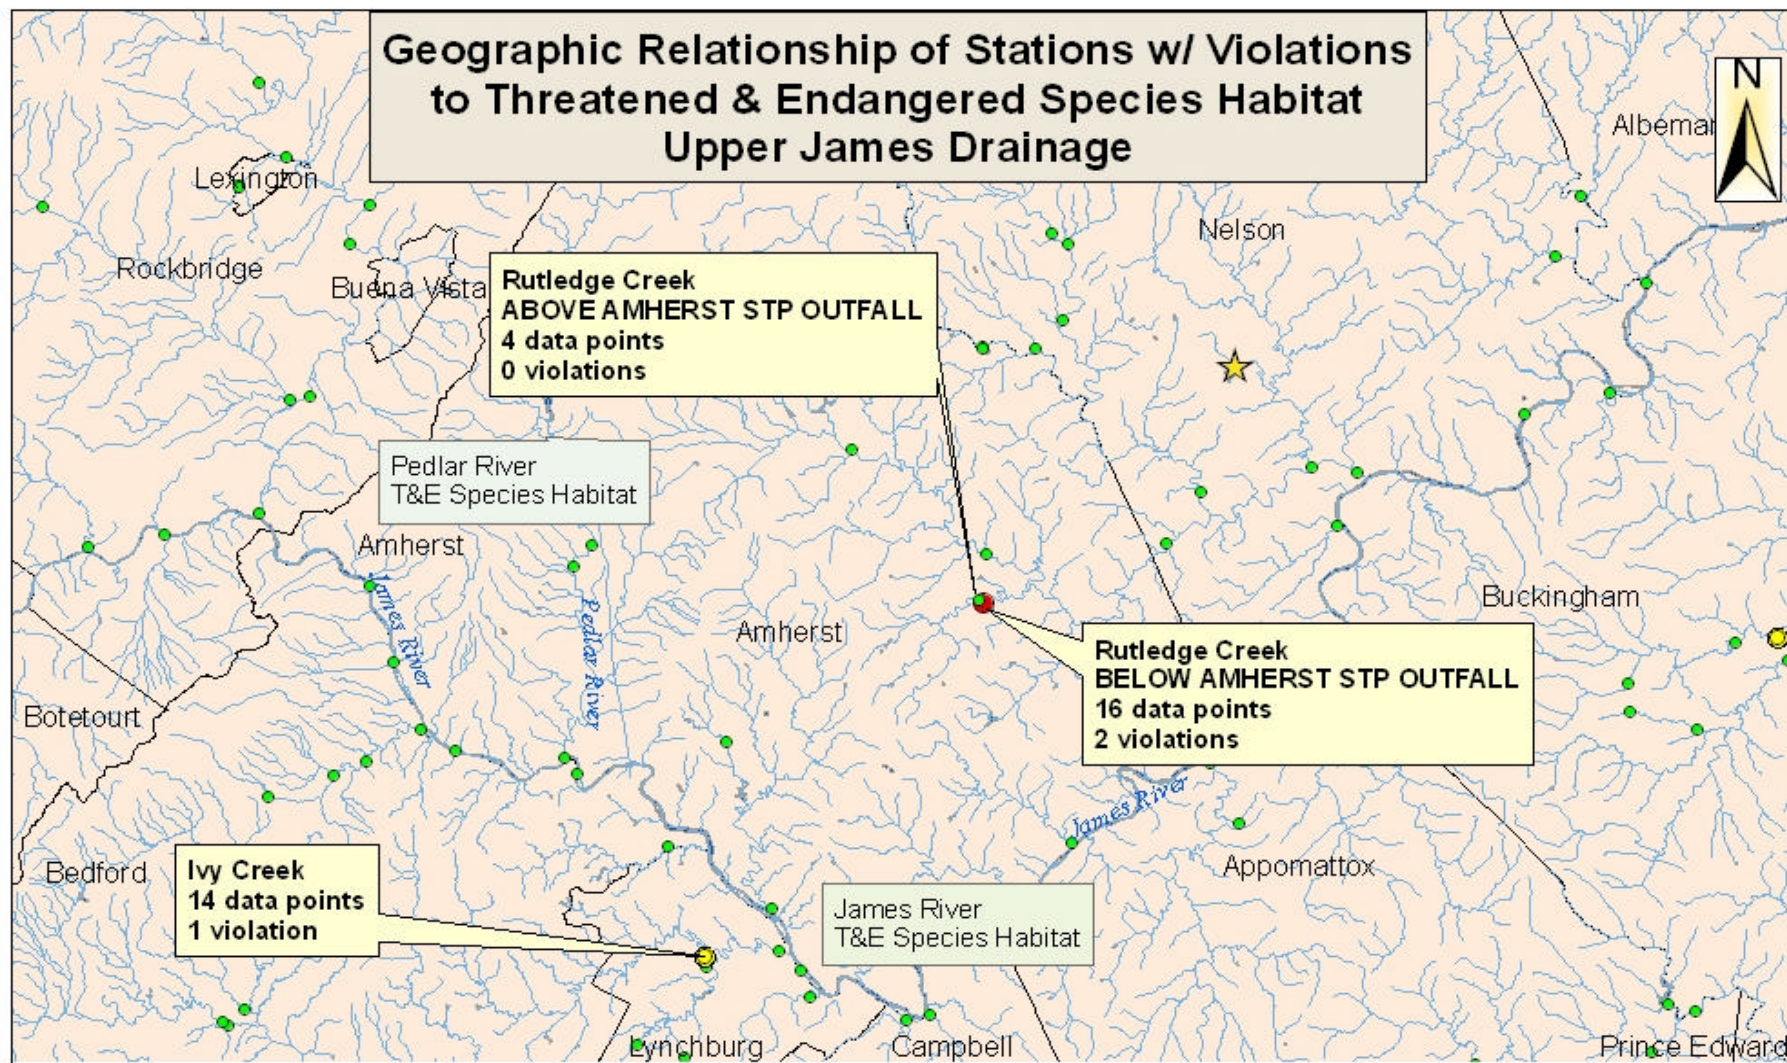

## Legend

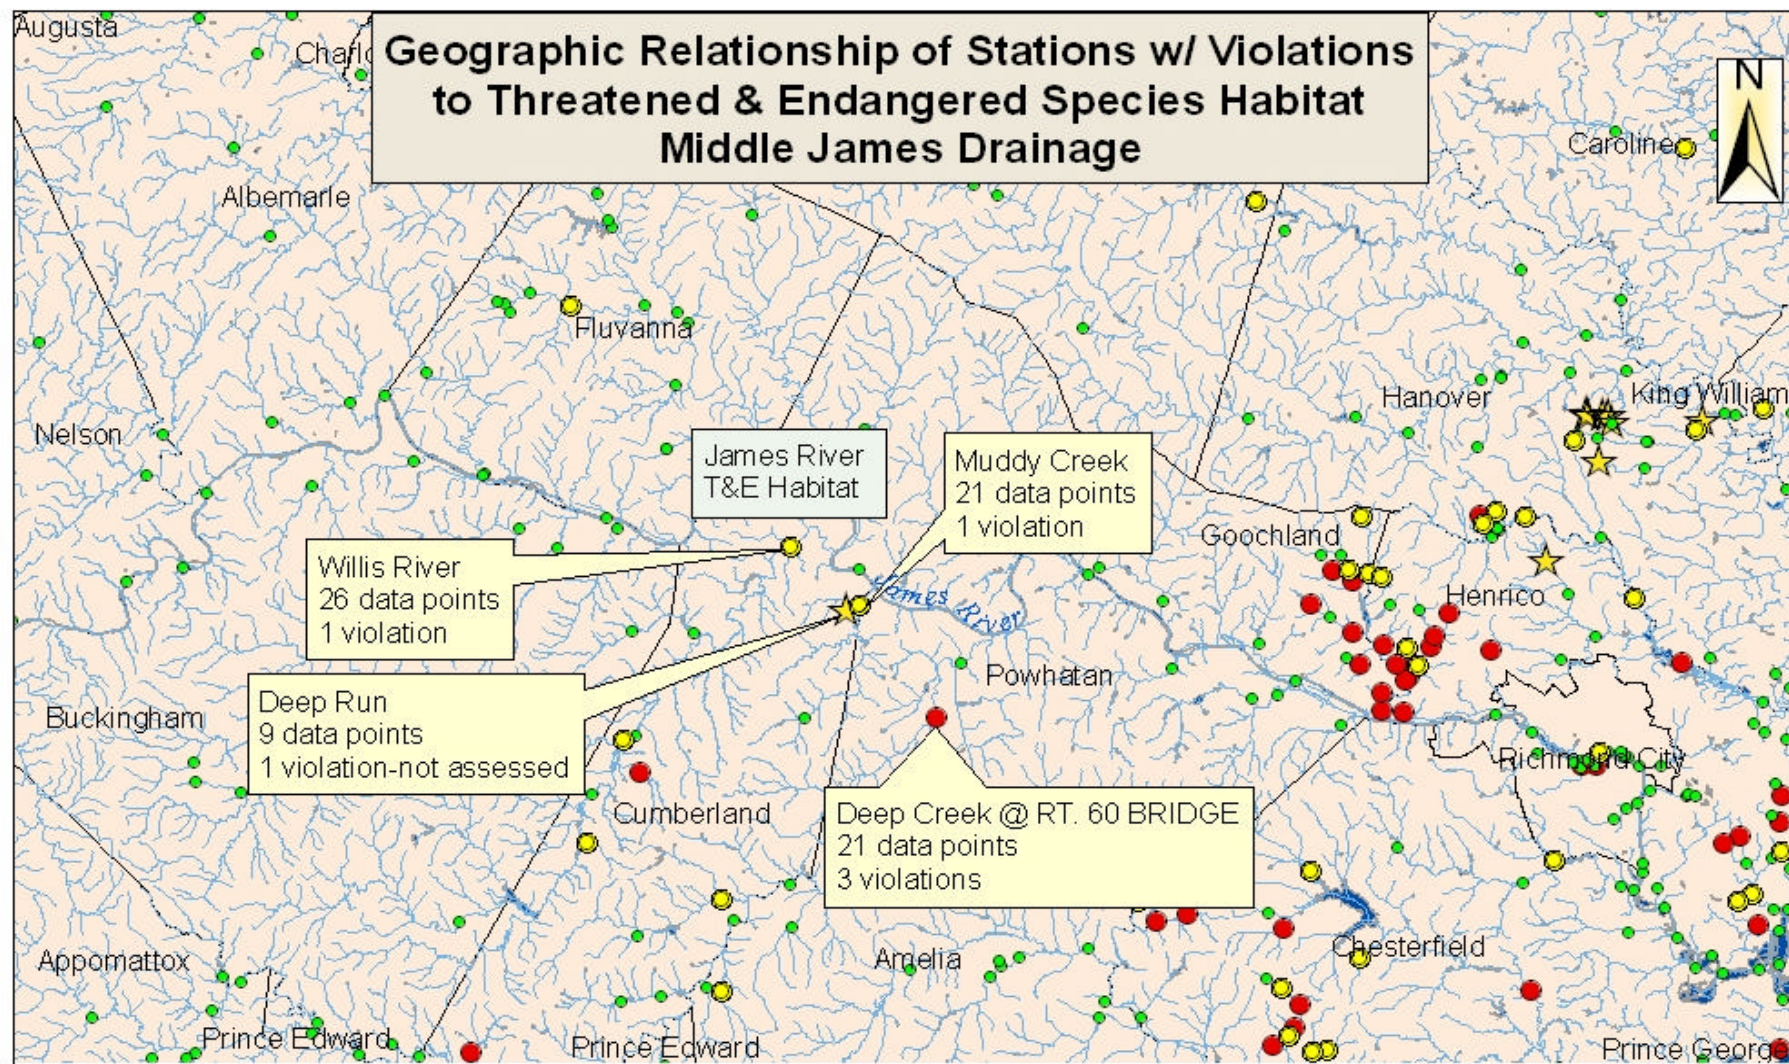

- DO Violations = 0
- DO Violation  $\leq 10.50\%$  = Unimpaired
- DO Violation  $> 10.50\%$  = Impaired
- ★ DO 1-9 Data Points w/ 1 Violation

# Geographic Relationship of Stations w/ Violations to Threatened & Endangered Species Habitat Upper James Drainage

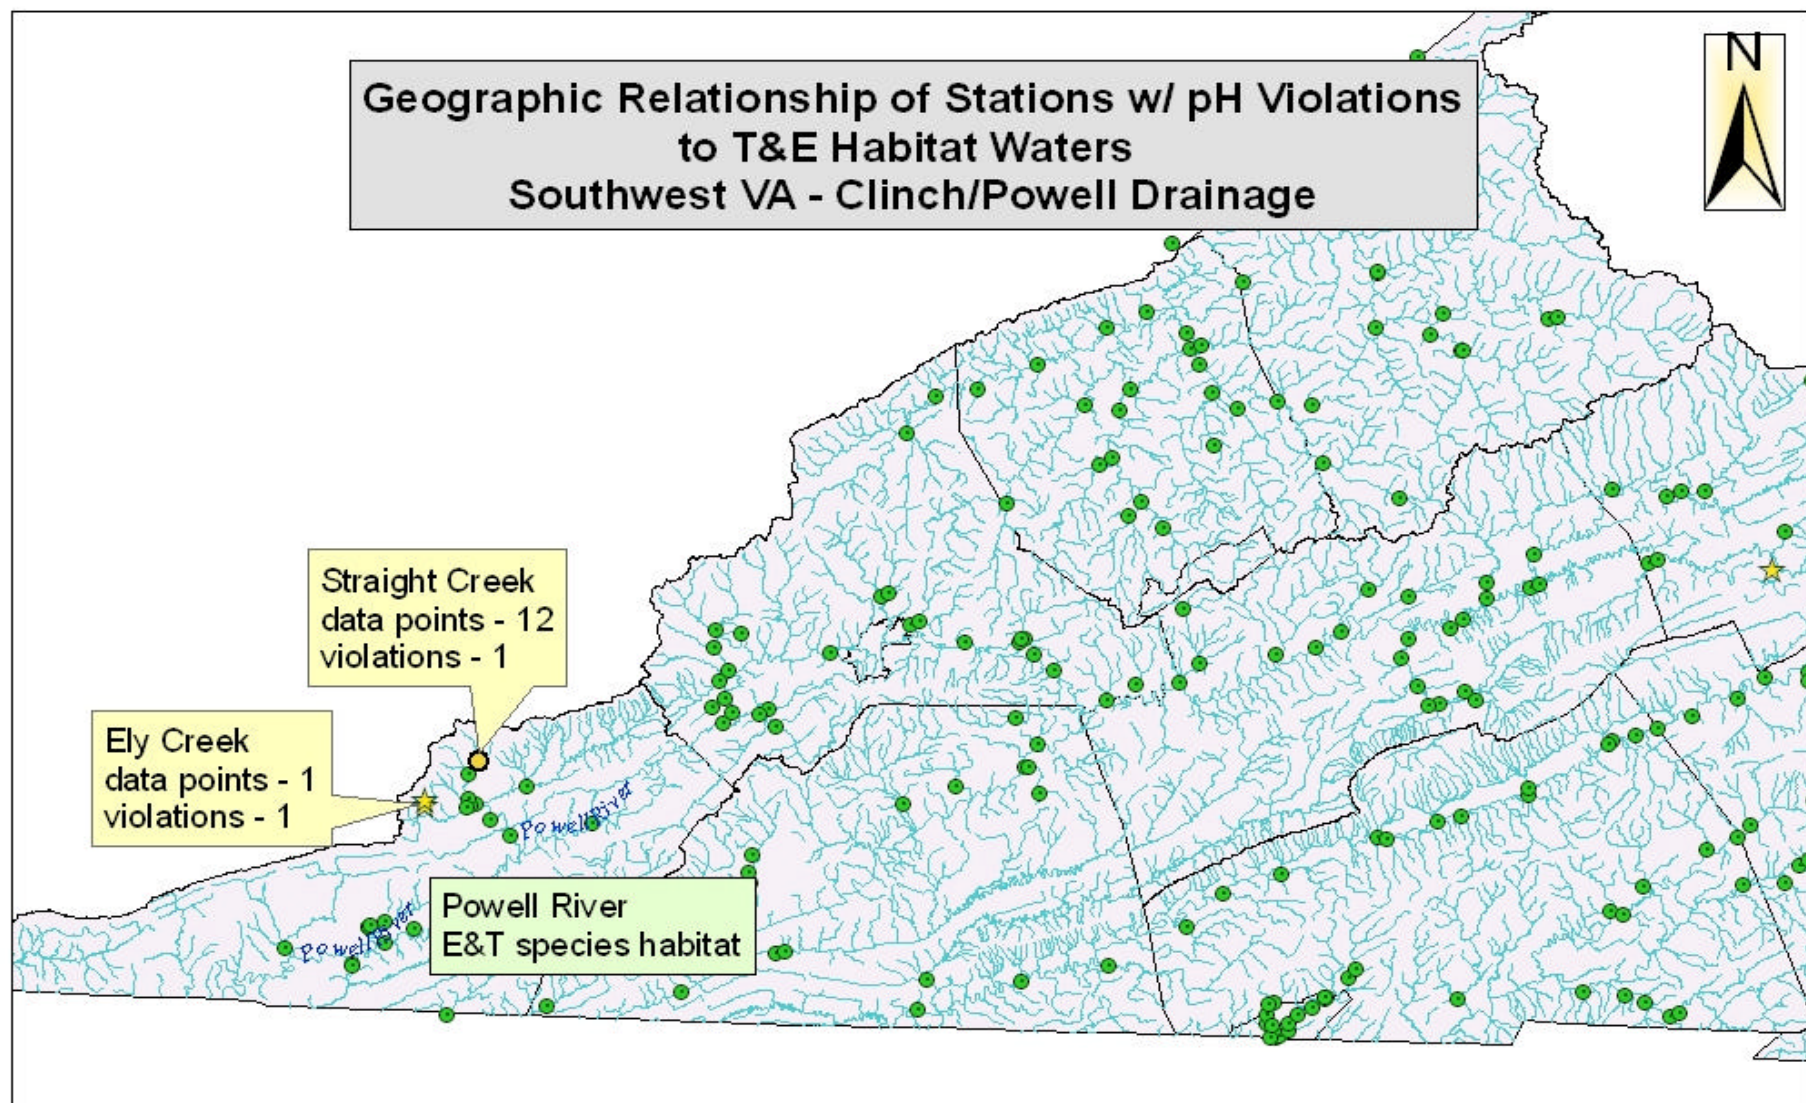

# **pH Violations w/i Threatened & Endangered Species Waters**

The following slides illustrate the geographic relationship of stations, assessed and unassessed for DO, to T&E species habitat.

# Geographic Relationship of Stations w/ pH Violations to T&E Habitat Waters Southwest VA - Clinch/Powell Drainage

Straight Creek  
data points - 12  
violations - 1

Ely Creek  
data points - 1  
violations - 1

Powell River  
E&T species habitat

- Legend**
- pH Violations = 0 = Unimpaired
  - pH Violations ≤ 10.5% = Unimpaired
  - pH Violations > 10.5% = Impaired
  - ★ pH 1 - 9 Data Points w/ 1 Violation

# Geographic Relationship of Stations w/ pH Violations to T&E Habitat Waters West Central - Roanoke&James Drainage

James River-Rt. 614 bridge  
data points - 18  
violations - 2

Upper James T&E  
species habitat

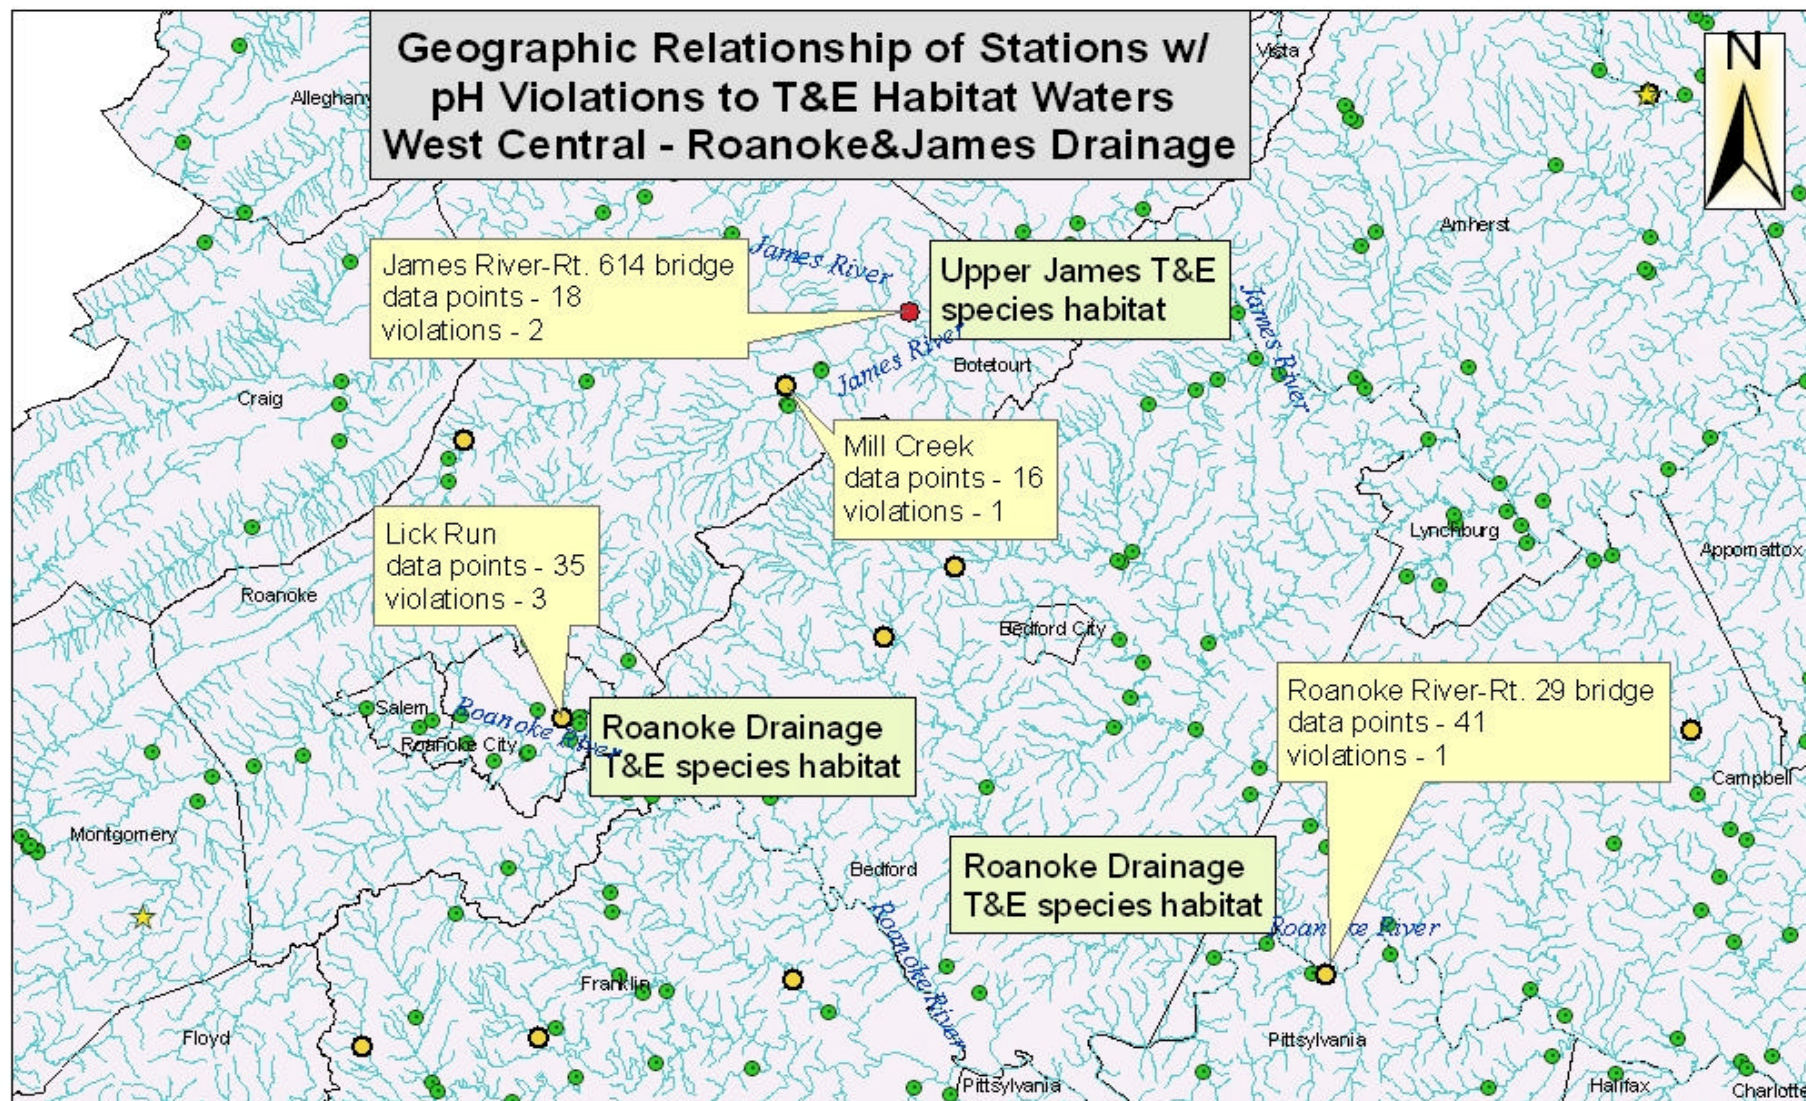

Mill Creek  
data points - 16  
violations - 1

Lick Run  
data points - 35  
violations - 3

Roanoke Drainage  
T&E species habitat

Roanoke River-Rt. 29 bridge  
data points - 41  
violations - 1

Roanoke Drainage  
T&E species habitat

## Legend

- pH Violations = 0 = Unimpaired
- pH Violations ≤ 10.5% = Unimpaired
- pH Violations > 10.5% = Impaired
- ★ pH 1 - 9 Data Points w/ 1 Violation

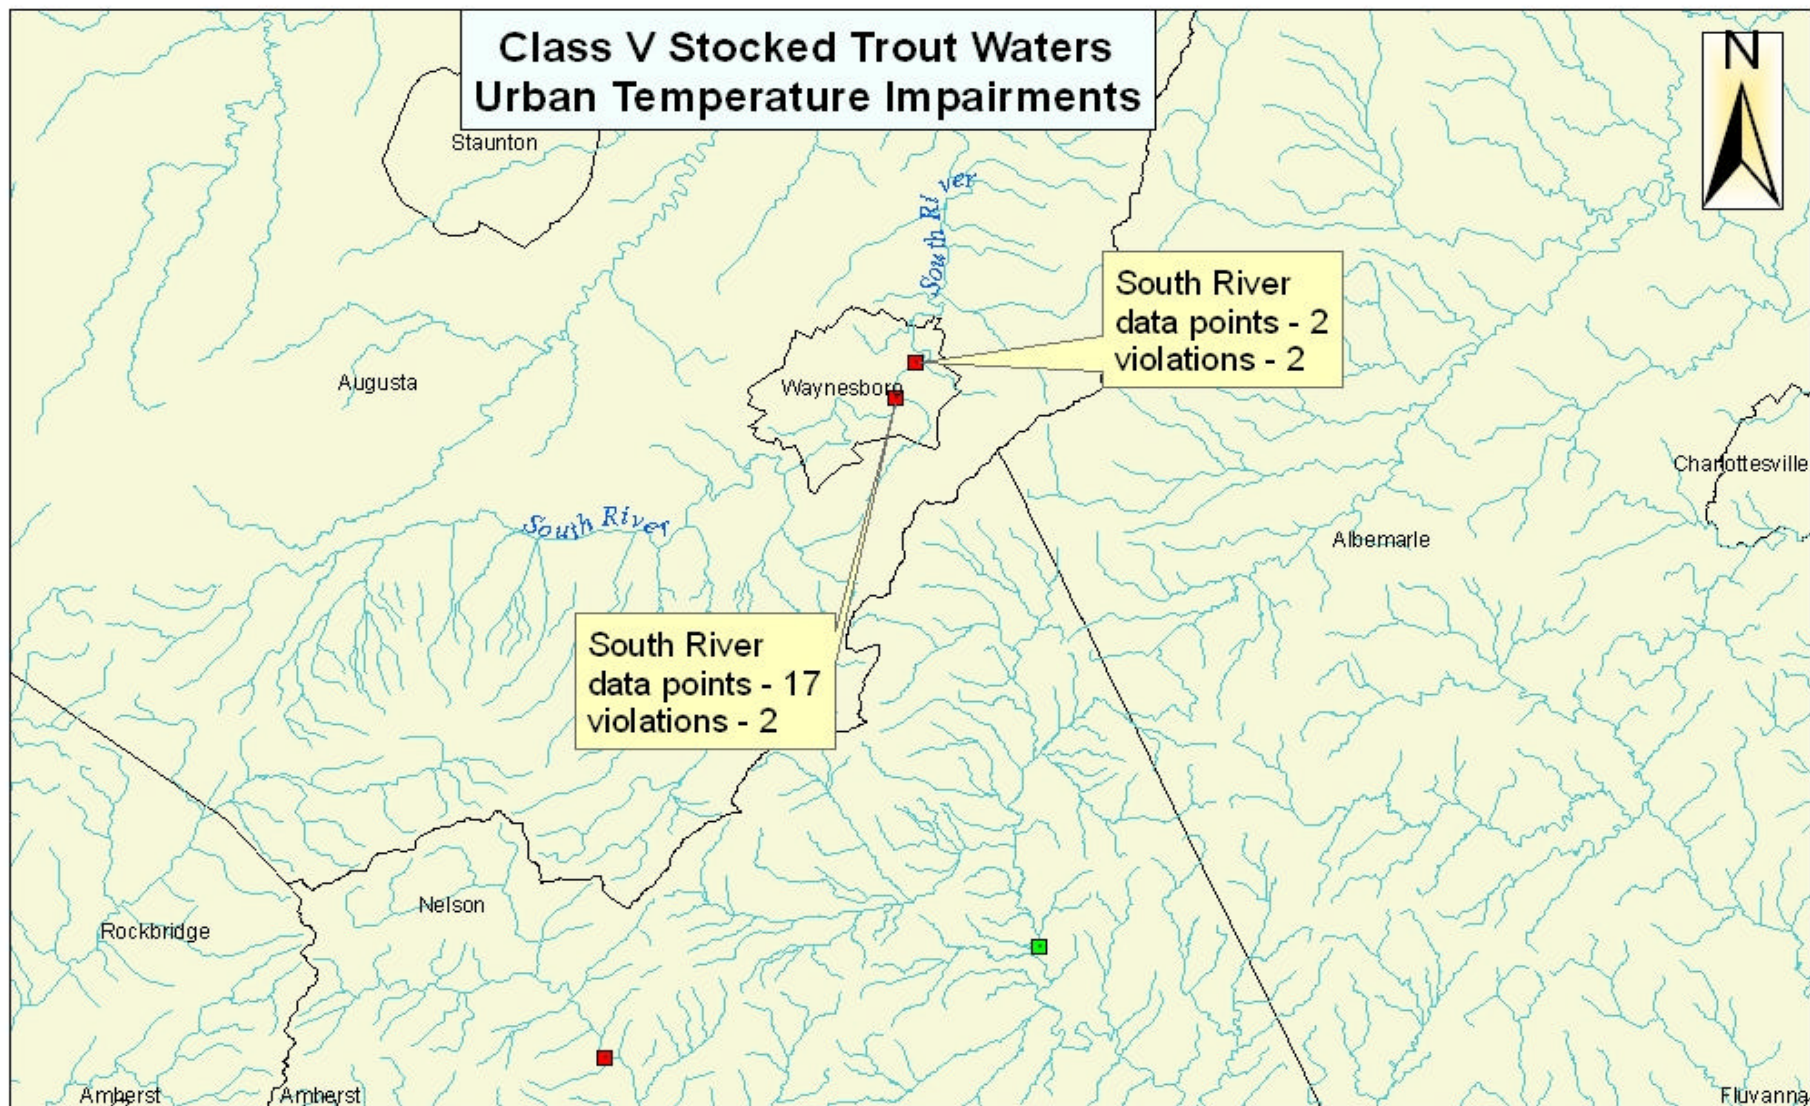

**Class V Stocked Trout Waters  
Stations Unimpaired, Impaired, &  
w/ Zero Violations for Temperature**

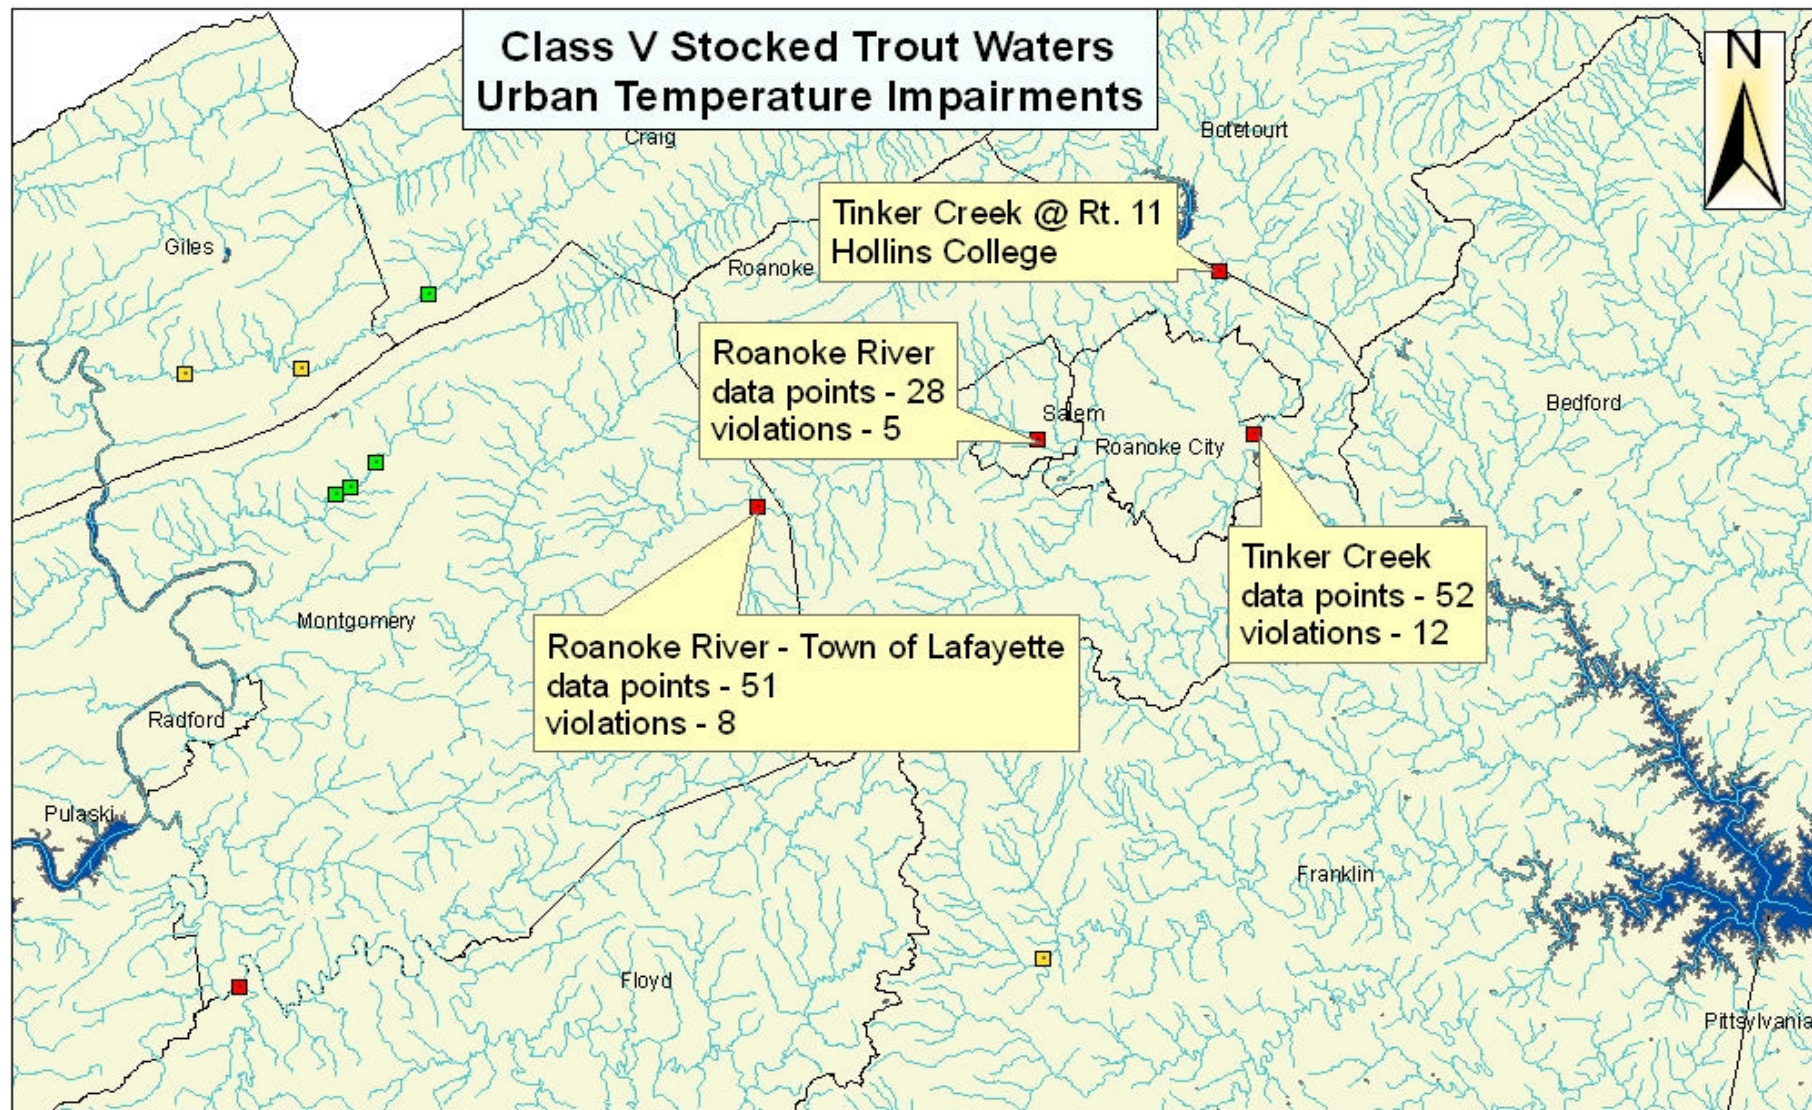

**Legend**

- Temp Violations  $\leq 10.5\%$  = Unimpaired
- Temp Violations = 0 = Unimpaired
- Temp Violations  $> 10.5\%$  = Impaired

## Class V Stocked Trout Waters Urban Temperature Impairments

### Legend

- Temp Violations  $\leq 10.5\%$  = Unimpaired
- Temp Violations = 0 = Unimpaired
- Temp Violations  $> 10.5\%$  = Impaired
